

E1 Banana Peel

Fixed position elbow orthosis

The E1 Banana Peel is a fixed-position elbow orthosis designed to maintain range and it offers excellent position control for elbow extension. The position is set at the time of fabrication according to the specifications stated on the order form. Wearing time in the Banana Peel should be built up over a few weeks, while observing the skin for undue stress.

Key Features

Fixed position

to maintain range of motion

Excellent position control

for elbow extension
