

# K1 Banana Peel

*Fixed position knee orthosis*

The K1 Banana Peel is a fixed-position knee orthosis designed to maintain range. It offers excellent position control for knee extension when resting. The position is set at the time of fabrication according to the specifications stated on the order form. The Banana Peel is intended to be used as a resting splint. The wearing time should be built up over a few weeks, while observing the skin for undue stress.

## Key Features

### Fixed position

to maintain range of motion

### Excellent position control

for knee extension

### Position of flexion can be specified at any angle

desired and is fixed at the time of fabrication.

### Custom fabricated from cast

### Moderately pliable plastic

with thigh and calf cuffs made of closed-cell foam and Velcro strap closures.

## Designed for patients who:

- Need durable, comfortable, long term positioning of the knee.
- Not intended for ambulation.
