

DAFO[®] Softback[™]

PF resist, DF free

The DAFO Softback is a custom AFO providing comfortable control of moderate toe walking and knee hyperextension. The Softback's posterior pad and strap combination work together to resist excess plantarflexion, while encouraging increased dorsiflexion.

Key Features

Custom-fabricated from a cast or scan

Soft yet durable padding sewn to flexible Dacron strap
strongly resists excess PF and encourages free DF

Full wraparound shell
for flexible control of foot position and alignment

Defined plantar surface contours

Designed for patients who:

- Demonstrate mild to moderate excess plantarflexion presented as toe walking or knee hyperextension.
- Require some resistance to plantarflexion.
- Will benefit from full access to dorsiflexion.
- Present with moderate to strong pronation or supination and associated gait instability.
- May benefit from the sensory feedback provided by a fully contoured foot bed.
