

JumpStart® Cricket®

Prefabricated maximum support shoe insert

CASCADE
daFO®

The Cricket was developed especially for children with mild to moderate pronation and supination. Stability and alignment improvement come from a deep heel cup, well-defined plantar surface, and medial / lateral forefoot containment in combination with a stable outer foundation. The sub-malleolar UCBL trimline allows the orthosis to become enclosed entirely within a shoe.

Key Features

Solid outer foundation

provides additional arch support and heel stabilization.

Partial wrap inner liner

made from soft, thin, polyethylene plastic cups heel, supports arches, and contains midfoot and forefoot. Trimline is below top edge of shoe.

Choice of two outer foundation materials

Polyethylene for moderate flexibility or co-poly for firm support.

Prefabricated

sized by measurement using the Fast Fit sizing jig.

Sizes: 4.00 – 7.75 inches (0.25 inch increments)

Designed for patients who:

- Exhibit a fully correctable foot position and fit within the product size range.
- Present with mild to moderate pronation or supination and associated gait instability.
- May benefit from the sensory feedback provided by a fully contoured foot bed.
- Require access to free dorsiflexion and plantarflexion.

No casting needed!
