

JumpStart® Leap Frog®

CASCADE
daFO®

Supra-malleolar (SMO) trimline, PF free, DF free

The JumpStart Leap Frog was developed to help young children with correctable moderate to strong pronation or supination to re-align their base of support for improved stability in standing and walking. Full wrap-around flexible support encompasses the foot and ankle for pronation and supination control. A well-defined plantar surface and wrap-around compression provide proprioceptive input. Solid outer foundation adds extra arch support and heel stability. The SMO trimline gently guides medial/lateral ankle alignment and fully encompasses the heel and forefoot for excellent alignment control.

Key Features

Open ankle trimline

allows for free dorsiflexion and plantarflexion movement.

Solid outer foundation

provides additional support and heel stabilization.

Full wrap inner liner

made from soft, thin polyethylene plastic allows full alignment control of the heel, mid-foot, and forefoot.

Choice of two outer foundation materials

Polyethylene for moderate flexibility or co-poly for firm support.

Prefabricated

sized by measurement using the Fast Fit sizing jig.

Sizes: 4.00 – 7.75 inches (0.25 inch increments)

Designed for patients who:

- Exhibit a fully correctable foot position and fit within the product size range.
- Present with moderate to strong pronation or supination and associated gait instability.
- May benefit from the sensory feedback provided by a fully contoured foot bed.
- Require access to free dorsiflexion and plantarflexion.

Pink

No casting needed!
