

JumpStart® Softback™

CASCADE
daFO®

AFO trimline, PF resist, DF free

The JumpStart Softback is a prefabricated AFO providing comfortable control of moderate toe walking and knee hyperextension. The Softback's posterior pad and strap combination work together to resist excess plantarflexion beyond 2 degrees, while encouraging increased dorsiflexion.

Key Features

Soft yet durable padding sewn to flexible Dacron strap
strongly resists excess PF and encourages free DF.

Dacron strap attaches to outer frame
for durability.

Full-wrap inner liner
provides alignment control of the heel, midfoot, and forefoot.

Inner liner tucks behind the padding
for added comfort.

Solid outer foundation
provides additional support and heel stabilization. Available in polyethylene for moderate flexibility or co-poly for firm support.

Prefabricated
sized by measurement using the Fast Fit sizing jig.

Widths: Wide and Narrow

Sizes: 4.00 – 9.00 inches (0.25 inch increments)

Designed for patients who:

- Exhibit a fully correctable foot position and fit within the product size range.
- Demonstrate mild to moderate excess plantarflexion presented as toe walking or knee hyperextension.
- Require some resistance to plantarflexion.
- Will benefit from full access to dorsiflexion.
- Present with moderate to strong pronation or supination and associated gait instability.
- May benefit from the sensory feedback provided by a fully contoured foot bed.

Flexible Dacron strap

Inner liner tucks behind the padding

No casting needed!
