

Removable Stretching Straps

Removable Stretching Straps (standard)

The standard Removable Stretching Strap is constructed out of nylon with a magnetic clasp at each end. The strap is placed under the met. heads on the plantar surface of the brace, with a magnetic clasp at each end.

Removable Stretching Straps (with added elastic)

The Removable Stretching Strap with added elastic has an additional elastic and Velcro hook portion that loops under the plantar surface of the brace. The Velcro hook adheres under the met. heads with a magnetic clasp at each end.
